ABOUT ME

HELLO!

My name is Roman and I'm a passionate and detail-oriented Frontend Software Engineer looking for an entry-level position within a company to use my coding skills, troubleshoot complex problems, and help complete projects on time.

WHY DID I CHOOSE IT?

Ever since I was a child, I liked everything related to computer technologies. But it happened that the previous profession was not close to my heart. After some time, when I grew up and realized that I liked more, I decided to start studying IT and from that moment it was clear to me that this is what I want to do.

WHY ME?

I learn quickly, accept criticism constructively and know how to work on mistakes. I also know how to work in a team and quickly find a common language. I can clearly set myself tasks and control the time of their completion. If you need a person in your team that you can rely on, it's me.
